Public Storage Reports Results for the First Quarter Ended March 31, 2019

GLENDALE, California – Public Storage (NYSE:PSA) announced today operating results for the quarter ended March 31, 2019.

Operating Results for the Three Months Ended March 31, 2019

For the three months ended March 31, 2019, net income allocable to our common shareholders was \$301.7 million or \$1.73 per diluted common share, compared to \$287.8 million or \$1.65 per diluted common share in 2018 representing an increase of \$13.9 million or \$0.08 per diluted common share. The increase is due primarily to (i) a \$7.4 million increase in self-storage net operating income (described below), (ii) a \$19.6 million increase due to the impact of foreign currency exchange gains and losses associated with our euro denominated debt and (iii) a reduction in general and administrative expense attributable primarily to \$7.8 million in incremental share-based compensation expense in the three months ended March 31, 2018 for the planned retirement of our former CEO and CFO. These increases were offset partially by (iv) our \$10.9 million equity share of gains on sale of real estate recorded by PS Business Parks, Inc. in 2018 and (v) an \$8.5 million allocation to our preferred shareholders associated with our preferred share redemption activities.

The \$7.4 million increase in self-storage net operating income is a result of a \$2.3 million increase in our Same Store Facilities (as defined below) and a \$5.1 million increase in our Non Same Store Facilities (as defined below). Revenues for the Same Store Facilities increased 1.5% or \$8.7 million in the three months ended March 31, 2019 as compared to 2018, due primarily to higher realized annual rent per occupied square foot. Cost of operations for the Same Store Facilities increased by 3.9% or \$6.3 million in the three months ended March 31, 2019 as compared to 2018, due primarily to increased property taxes and higher marketing expenses. The increase in net operating income of \$5.1 million for the Non Same Store Facilities is due primarily to the impact of facilities acquired in 2018 and 2019, and the fill up of recently developed and expanded facilities.

Funds from Operations

For the three months ended March 31, 2019, funds from operations (“FFO”) was \$2.52 per diluted common share, as compared to \$2.37 in 2018, representing an increase of 6.3%. FFO is a non-GAAP measure defined by the National Association of Real Estate Investment Trusts and generally represents net income before depreciation and amortization expense, gains and losses and impairment charges with respect to real estate assets. A reconciliation of GAAP diluted net income per share to FFO per share, and additional descriptive information regarding this non-GAAP measure, is attached.

We also present “Core FFO per share,” a non-GAAP measure that represents FFO per share excluding the impact of (i) foreign currency exchange gains and losses, (ii) EITF D-42 charges related to the redemption of preferred securities, (iii) accelerations of accruals due to the retirement of our former CEO and CFO and (iv) certain other non-cash and/or nonrecurring income or expense items. We review Core FFO per share to evaluate our ongoing operating performance, and we believe it is used by investors and REIT analysts in a similar manner. However, Core FFO per share is not a substitute for net income per share. Because other REITs may not compute Core FFO per share in the same manner as we do, may not use the same terminology or may not present such a measure, Core FFO per share may not be comparable among REITs.

The following table reconciles from FFO per share to Core FFO per share (unaudited):

	Three Months Ended March 31,		
	2019	2018	Percentage Change
FFO per share	\$ 2.52	\$ 2.37	6.3%
Eliminate the per share impact of items excluded from Core FFO, including our equity share from investments:			
Foreign currency exchange (gain) loss	(0.04)	0.07	
Application of EITF D-42	0.05	-	
Acceleration of share-based compensation expense due to retirement of former CEO and CFO	-	0.04	
Core FFO per share	<u>\$ 2.53</u>	<u>\$ 2.48</u>	2.0%

Property Operations – Same Store Facilities

The Same Store Facilities represent those facilities that have been owned and operated on a stabilized level of occupancy, revenues and cost of operations since January 1, 2017. We review the operations of our Same Store Facilities, which excludes facilities whose operating trends are significantly affected by factors such as casualty events, as well as recently developed, expanded, or acquired facilities, to more effectively evaluate the ongoing performance of our self-storage portfolio in 2017, 2018 and 2019. We believe the Same Store information is used by investors and REIT analysts in a similar manner. The Same Store pool increased from 2,046 facilities at December 31, 2018 to 2,165 facilities at March 31, 2019. The following table summarizes the historical operating results of these 2,165 facilities (139.8 million net rentable square feet) that represent approximately 85% of the aggregate net rentable square feet of our U.S. consolidated self-storage portfolio at March 31, 2019.

(a) Revenues and cost of operations do not include ancillary revenues and expenses generated at the facilities with respect to tenant reinsurance and retail sales.

(b) See attached reconciliation of self-storage NOI to net income.

- (c) Realized annual rent per occupied square foot is computed by dividing annualized rental income, before late charges and administrative fees, by the weighted average occupied square feet for the period. Realized annual rent per available square foot ("REVPAF") is computed by dividing annualized rental income, before late charges and administrative fees, by the total available rentable square feet for the period. These measures exclude late charges and administrative fees in order to provide a better measure of our ongoing level of revenue. Late charges are dependent upon the level of delinquency, and administrative fees are dependent upon the level of move-ins. In addition, the rates charged for late charges and administrative fees can vary independently from rental rates. These measures take into consideration promotional discounts, which reduce rental income.
- (d) Annual contract rent represents the agreed upon monthly rate that is paid by our tenants in place at the time of measurement. Contract rates are initially set in the lease agreement upon move-in and we adjust them from time to time with notice. Contract rent excludes other fees that are charged on a per-item basis, such as late charges and administrative fees, does not reflect the impact of promotional discounts, and does not reflect the impact of rents that are written off as uncollectible.

Operating data, metrics, and further commentary with respect to these facilities, including detail by vintage, is included in “Management’s Discussion and Analysis of Financial Condition and Results of Operations” under “Self-Storage Operations” in our March 31, 2019 Form 10-Q.

- (a) FFO and FFO per share are non-GAAP measures defined by the National Association of Real Estate Investment Trusts and, along with the non-GAAP measure FAD, are considered helpful measures of REIT performance by REITs and many REIT analysts. FFO represents GAAP net income before depreciation and amortization, real estate gains or losses and impairment charges, which are excluded because they are based upon historical costs and assume that building values diminish ratably over time, while we believe that real estate values fluctuate due to market conditions. FAD represents FFO adjusted to exclude certain non-cash charges and to deduct capital expenditures. We utilize FAD in evaluating our ongoing cash flow available for investment, debt repayment and common distributions. We believe investors and analysts utilize FAD in a similar manner. FFO and FFO per share are not a substitute for net income or earnings per share. FFO and FAD are not substitutes for GAAP net cash flow in evaluating our liquidity or ability to pay dividends, because they exclude investing and financing activities presented on our statements of cash flows. In addition, other REITs may compute these measures differently, so comparisons among REITs may not be helpful.

(a) Net operating income or “NOI” is a non-GAAP financial measure that excludes the impact of depreciation and amortization expense, which is based upon historical costs and assumes that building values diminish ratably over time, while we believe that real estate values fluctuate due to market conditions. We utilize NOI in determining current property values, evaluating property performance, and in evaluating operating trends. We believe that investors and analysts utilize NOI in a similar manner. NOI is not a substitute for net income, operating cash flow, or other related GAAP financial measures, in evaluating our operating results. This table reconciles from NOI for our self-storage facilities to the net income presented on our income statement.
